

ABOUT OPUS ONE SERIES

The Majestic Opus One series of orchestral snare drums seamlessly combines classically inspired design elements with a carefully curated assortment of shell sizes, bearing edge refinements and select shell materials to create a family of instruments perfectly suited for orchestral stages, modern percussion ensembles, solo performances, and a variety of audition environments. Born of extensive research of prized heirloom instruments heard regularly in some of the finest symphony halls around the world, these drums faithfully recreate these coveted sound profiles while simultaneously offering the benefit of modern advancements in tuning stability, versatility and dynamic range.

ORCHESTRAL SNARE DRUMS
USER MANUAL

Dear Aficionado of Fine Percussion Instruments,

Thank you for adding this drum to your collection, you have exquisite taste! Your snare drum has been inspected and has received an initial tuning so that it is as close as possible to being ready to play, right out of the box.

For specifications and tuning suggestions, please refer to this hangtag
Now...drum roll as you set off on your Majestic journey.

Sincerely,
MAJESTIC PERCUSSION

FEATURES

Cherry

Brass

Cast Iron

Premium Shell Materials
Cherry (8ply, 9mm) warm/ vintage
Brass (1.2mm) bright / classic
Cast Iron (6.35mm) rich / sonorous

Claw Hook
The revolutionary "Rigid-Cast" claw hook design utilizes an oblong receiver hole enclosed in a diecast housing which prevents cracking, ensures proper tuning alignment, and allows flexible tolerance for both synthetic and natural heads.

l Lugs
To achieve a classic and elegant look as well as maximum shell resonance, the Opus One series drums feature the chrome plated "l" lug.

FEATURES

The OP-01 Strainer

The smooth and silent OP-01 strainer is a simple and classic functional design featuring a laser-engraved knurled vertical fine tuner adjustment.

Integrated Bridge

The integrated bridge sets the optimal angle allowing the snare cables to establish a true and consistent point of contact with the resonate side head. The result is extreme responsiveness at all dynamic levels and playing areas of the drum.

Heads and Drumdial® Suggestions

Each model comes with specific head combinations and Drumdial® tuning suggestion through extensive testing with world renowned artists.

SPECIFICATIONS & TUNING SUGGESTIONS

CHERRY WOOD

MOS1325PB

INTEGRATED SNARE CABLE SETS

Each model features its own unique set of hybrid or single-type snare cables in order to maximize the sensitivity of the instrument with which they are paired. These cables are available separately as replacements for the drums they are paired or for experimenting with other models.

Hybrid

ST16-1401
Uncoated Stainless (5)
0.6 mm & (11) 0.8 mm

ST16-1402
Uncoated Stainless (6)
0.6 mm & (10) 0.8 mm

ST16-1403
Uncoated Stainless (4) 0.6 mm
& (10) 0.8 mm & (2) 1.0 mm

Single

NW16-13
Nickel Alloy (16) 0.56mm

NW16-1302
Nickel Alloy (16) 0.61mm

CS16-14
Coated Stainless (16) 0.85mm

Opus One

FREQUENCY MODIFIERS

Frequency modifiers are accessories crafted from selected materials and intended to allow performers to quickly modify the snare drum's tone. Extensively tested and tailored using the most suitable materials, shapes, and weights as to not muffle desirable frequencies or stifle the drum's response but rather allow the player to enhance and expand the pallet of sounds available.

PVC Frequency Modifier Models

PFM1440/50
Included with
MOS1440BR
& MOS1450BR

PFM1465
Included with
MOS1465PB
& MOS1465BR

PFM1470
Included with
MOS1470CR

Cloth Frequency Modifier Models

CFMH13
Half-sheet Double Tucked
for 13" drums
Included with MOS1325PB

CFMF13
Full-sheet Double Tucked
for 13" drums

CFMH14
Half-sheet Double Tucked
for 14" drums

CFMF14
Full-sheet Double Tucked
for 14" drums
